

This document is a card which you can customize with your own information.

It has been favorably accepted by many merchants.

You can print it on a 4" X 6" card and carry a supply with you.

Please Note

**We would like to be able to visit
your place of business.**

However due to the use of Compact Fluorescent Light (CFL) bulbs I am unable to enter as they take away my ability to walk, causing me to fall and possibly sustain further spinal cord injury.

Due to the deleterious effects of the Critical Flicker Frequency and the Electromagnetic Emissions from CFLs **many people are unable to tolerate them.** They risk imminent physical harm from even a momentary exposure to the effects of CFLs

Medical research, in Canada, the U.S.A., and the U.K., has shown that CFL's can cause serious problems for people with migraines, epilepsy, vestibular issues, lupus, autism, MS, diabetes, memory loss, muscle spasms, tremors, cardiac arrhythmias, to name a few which are mentioned in those medical studies.

We commend your desire to conserve energy, but the CFL is a product of the ill-advised actions of well-intentioned people and legislators who set out to conserve energy but did not research the unintended consequences of their actions and the cataclysmic results thereof.

If you would like to review some of this research, please go to <http://www.cflimpact.com/> or call me at 555.555.1212. Thank you for reading this.
